updated 22. 12. 2023 | published 22. 12. 2023

Summary

A simple floor and wall piece I designed on the OpenLock tile system.

This tile must be printed without support. I personally print it at .2 layer hight. It is a part of a set dungeon tiles that can be found here: <https://www.printables.com/social/482937-pieter-stobbe/collections/384219> .

I love to share these files with all of you 3D printing tabletop enthousiasts. However, if you don't feel like printing the tiles yourself, or looking for some cool resin printed tabletop minis, check out my website (EU) www.dungeonhero.nl , or Etsy shop (non-EU) <https://www.etsy.com/shop/DungeonHero> .
