The model consists of a campfire, a cooking rack with a pot and a tree stump. All parts are printed with PLA, 0,4mm nozzle, 0,2mmm layer
1.) Campfire
The campfire is designed be illuminated with a 3mm yellow LED. For 5mm LEDs, or RGB LEDs, the negative volume inserted in the .3mf file must be increased. The arrangement of the colors in the MMU is as follows. 1-black; 2-transparent; 4-red. The campfire needs no brime, but some painted supports or support on the printbed. For a one-color print, a complete file is available as .stl.

2) Cooking rack with pot
The cooking rack is printed in one piece. Support on the print bed and brime on the rack feet are necessary. The arrangement of colors in the MMU is as follows. 1-black; 2-copper; 5-yellow. The finished print must be carefully detached from the bed. For a one-color print, a complete file is available as .stl.

3. tree stump
The tree stump can be printed without support and brime.

Enjoy and Merry Christmas
