Summary

Don't have quite enough space in that last row? I made a 35mm wide version just for you!

I was on the Gridfinity train, planning out my first drawer, and I had ALMOST enough room for one more section, but not quite. So, I made a filler version that is, of course, 7mm smaller in width than the original size.

That way, I don't lose that 35mm of space, and it's perfect for long, narrow objects like rulers or scales!

I only made these only 1 column wide because I'm just using them down the side, to fill in the space where the regular 42mm wide units won't fit.
