Tags: [batteryholder](#) [honeycombstoragewall](#)

Combo AA and AAA battery holder for the Honeycomb Storage Wall system.

The holder is printed in two pieces, and put together using friction-fit. It might take a bit of force, but do it using gentle percussive persuasion, rather than hammering at it, to avoid breaking the joining-fingers.

Attach using countersunk M3 screws to two HSW M3-inserts, for using on the wall.

Recommend printing using at least 3 perimeters.
