This is a remix of the design by Claimed4All for a Ryobi 18v battery wall mount.

I like the battery mount design, but I needed to change the spacing and layout of the batteries. This single battery mount will work well to attach directly to the wall or to a french cleat system!

This mount is only released via creative commons [Attribution—Noncommercial—Share Alike](#) license. This is not authorized for resale or commercial production. I regularly review web stores for people violating these terms.

This remix is based on
