10/01/2023 Update - ‘Ship Stands - Silver’ Stl file has been adjusted so all of the stands are flat. Some of the stands were floating very slightly above the build plate. This has been fixed.

Relive the iconic moment from the first Star Wars film with this miniature foldable playset of the Trench Run.

When time to play just unfold the playset and attach the parts appropriately to recreate the awesome trench run scene. The ships also

have stands which can be pegged into numerous positions throughout the set.

This set comes with Millenium Falcon, Tie Fighters and the X-wings.

For the assembly, please refer to the images. Its actually a simple build, but some of the parts are a little fidgety to assemble.

Any questions just send me a DM.

Please note some of the parts may cause a choking hazard, so these 3D printed toys are not recommend for children under the age of 6.

Also note - This is not a MMU print. Simply print the parts in the appropriate colours and glue them together.

To see how to carry out filament changes mid-print, please refer to the link below.
