The Man of Steel.

Or in this case: plastic.

This guy is a huge part of my childhood. I hope I did him justice here, and that you, dear visitor, have a good time printing him (should you choose to do so) and give him a good home on one of your shelves!

### Print instructions

Printed on a CR-10S at 0.12mm layer height, 190°C, 60 mm/s, 5% (or maybe 7%...) infill, using a 0.4mm nozzle.

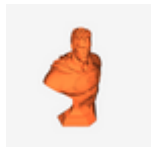

The lower "wedge" part needed some custom supports.
