Tags: sword collapsing lightsaber

This Lightsaber has a removable collapsing blade that can be printed separately in a different color. The hilt is designed with a screw on cap which allows the blade to be inserted after its printed. Prints without supports, but you will need a printer capable of printing the hilt 205mm tall.
Download the updated multi-part version here.

The blade is compatible with the first lightsaber but since this one has the angle on top it will be visible when collapsed. As a result I included a shorter blade for this version. The hilt is 213mm long with the cap installed but it expands to over 925mm in total length with the collapsing blade installed!

Supports are not required, for best results use a .4mm nozzle. Find detailed instructions on how to print collapsing swords on my website. If this is your first time printing, I would suggest you try the test print first.
Support and Licensing

If you would like to help support more free models or get permission to sell physical copies of my models, consider joining my Clubs Membership or using my Prusa Shop Affiliate.
