Summary

A simple clamp for desks 21-47mm thick - allows headphones or anything else to hang off the end

[Household](#) > [Office](#)

Tags: [headphone](#) [desk](#) [stand](#) [clamp](#)

A simple clamp which attaches to the side of your desk and enables you to hang your headphones from it. This should work with even quite thick desks.

I recommend printing the main body with supports for the threaded part, nothing else should need supports.

I printed mine with a 0.4mm nozzle and 0.2mm layer height in black PLA.

Used 26g of filament and took just under 4 hours for me on an Ender3v2.

Model files

[desk-clamp-headphone-stand-body.stl](#)

desk-clamp-headphone-stand-screw.stl

☐ Sized 6% smaller than the threads in the body so should work just fine as is.
