Part of a FREE 3D-printable miniatures project you can find at <https://www.patreon.com/DungeonWardenMiniatures>

Your support is vital to the survival of this project. Thank you :)

- FDM-compatible (the smaller the nozzle, the better the detail).
- 'Base' model for significantly easier printing and structural strength.

One variation of the Skeleton-themed NPC pack of FREE miniatures. One-handed weapon and shield combo, heavy armor with chainmail, metal plate armor and a tunic underneath.

Print instructions

Works on both resin and FDM.

The miniature was designed for 3D printing from the start - fully solidified, exaggerated details and thick, reinforced mesh walls bumping into each other whenever possible for structural strength. If any problems arise I'll be working to fix and re-upload a revised version.
