...If you don't feel like springing for a coffee, please at least be sure to hit like & post a make, I'd love to see your prints!

A super quick design to turn your Spiral Vase Rose into a glowing electronic tea light with a natural rosebud style base/holder. Excuse the poor test print - looks great in the dark! Haha

Designed for the 5cm version with no bottom.

Obviously DO NOT use a candle based tea light in this, use battery powered only!

Support build plate only, use high fans settings.
