Sturdy shower head holder, easy to print and easy to mount.
There are versions for shower rails with a diameter of 18, 19, 20, 22, 25 and 28 mm, please select the appropriate 5 files.

How to print:

To create stable threads, I recommend configuring the line width about 3x the layer height (a larger line width to layer height ratio allows for better overhangs).
Print hot and slow (for better layer adhesion), and keep objects in their specified orientation.

How to assemble:

Please follow the scheme above (last picture).

Do you like it?

If you have printed this design and you like it, I would be happy if your make is uploaded.
