This wall mount supports 3"+ quadcopters.

Pictured are one 3" and two 5" quadcopters.

Print instructions

I printed this in Hatchbox White ABS but really any material should work.

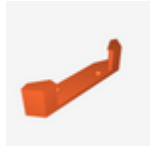

This object is designed to print as is with no supports--be sure to orient the object in a way the layer lines will be horizontal on the front for strength.

Staggered holes prevent wobble and increase strength when mounted.
Grips on the inside of the hooks prevent the quadcopter from shifting when mounted.

Infill: 10-20%

Perimeters: 2-3
