[tux](#)

Modified primarily for multi-extrusion printers, but since I have quite significantly reworked the original model I decided to include single extrusion model too.

Other modifications (apart from preparation for color printing):

Remeshed/smoothed whole model.

Beak is slightly smaller and angled, so it is printable without support.

Wings are now more print-friendly, but supports are most likely still needed.

Left wing repaired (some slicers had problems with it).

Different pupils.

Remixed from the model by me2space:
