Summary

Chopstick Holder set with tray

3D Printers > Accessories

Tags: kitchen tray accessories kitchenorganizer chopsticks

I designed this Chopstick Holder set with tray in SOLIDWORKS for the Printables Chopstick Holder contest (18/02/2023).

It is already orientated to print easily in STEP & STL files so no supports required.

The 4 Chopstick Holders fit snuggly into the tray.

I printed it with SUNLU Marble PLA & ESUN PLA silk copper.

There is print files for:

1. All 4 Holders together - 3D Manufacturing Format/STEP File
2. Each holder separately (numbered 1-4) - (.STL)
3. The tray- 3D Manufacturing Format/STEP File/(.STL)

There is model files for:

1. All 4 Holders together - SOLIDWORKS Assembly

2. One Chopstick Holder - SOLIDWORKS Part
3. Chopstick Holder tray - SOLIDWORKS Part

If needed yo can create any format that's comfortable for you to print from the original SOLIDWORKS files.

Printer: Artillery GENIUS PRO
Resolution: 0.20
PEI magnetic sheet
Slicer: PrusaSlicer
Design software: SOLIDWORKS

Enjoy!
