Hello Friends of Brakets / Clamps for every purpose. I made a few different Designs.

You need to Print 3 Parts (Top / Botton / Screw) - You could also buy a M8 x 1,25mm.

If you want a custom Design let me know. Please share your makes, so i'll see the time was not wasted.

If you want, you could add a spring around the screw, to open the clamp.

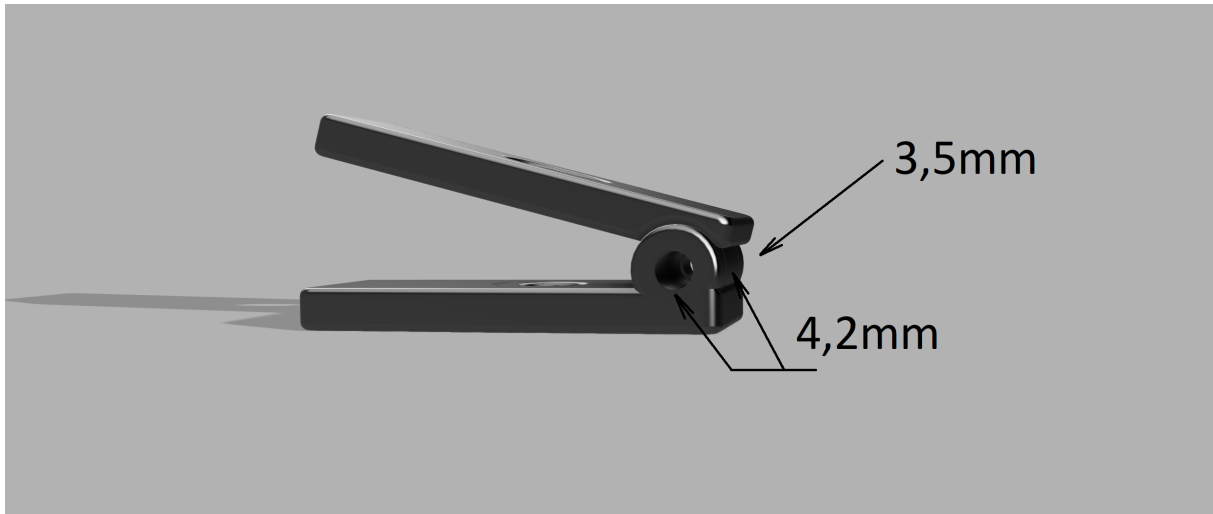

Enjoy and have fun.

If you like to gift me a coffee i really appreciate it:

>> Update:

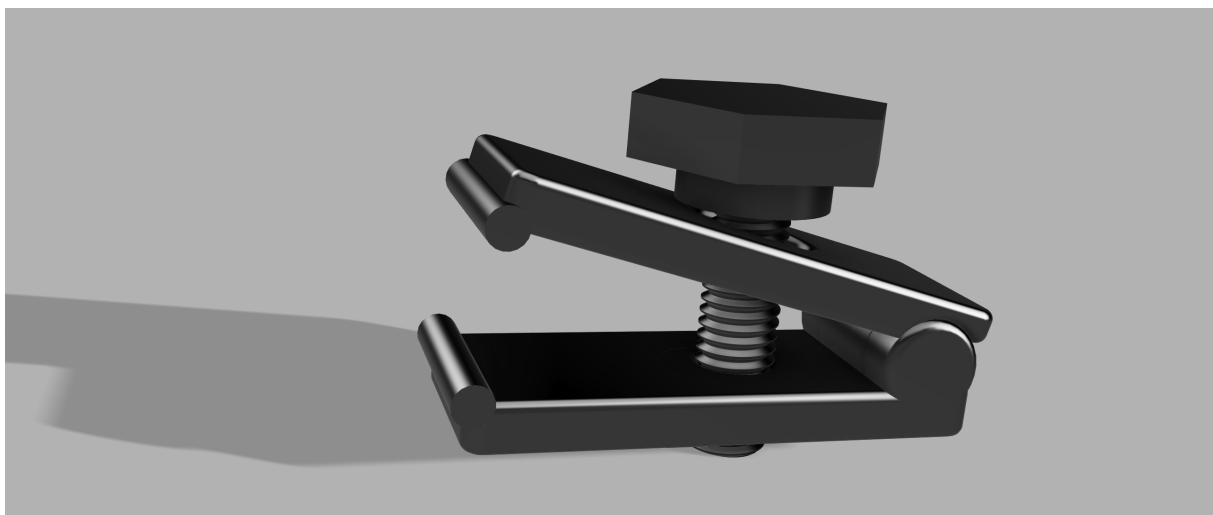

Added a blank-Model with holes in the hinge for M4 Screw, tapping into the last Part - up to your Printer. - Check: drilled_top / drilled_bot Models.
