Summary

RGB LED infinity cube using a RGB strip light and bluetooth controller.

Household > Other House Equipment

RGB LED infinity cube using a RGB strip light and bluetooth controller.

Print instructions

Print:
2x Frame
1x Frame with hole
6x small diffuser
3x large diffuser

I recommend printing with 0.6 nozzle ad .3 layer height due to size.

I used prusament galaxy black pla and filamentum crystal clear pla for the diffuser and used super glue to attach parts together.

Model files

small-diffuser.stl

large-diffuser.stl
