Easy to 3D print security cover for enhanced privacy with your handy Logitech StreamCam C980. No glue, just click the cover into the frame hinge and mount it on the camera. Easy to open, easy to stay close. Printed in cca 30-40 minutes with 0.15mm layers.

EDIT (12. 2. 2021): New refined design **V2** added. More robust hinges and a few small tweaks. Overall design remains.

EDIT (22. 12. 2022): Note on questions about the smaller thickness of the cover: Thanks to the designed cover thickness, you can still see if the

active camera diode is lit. At the same time, however, nothing can be seen in the opposite direction. :) Happy streaming.

Print instructions

Choose 0.15 or .1 layers.
