This is a Remix made in Bambu Slice from [Bugman_140's Barry Bear](#) with Fuzzy Skin.

These are Ready to Print Files, made in Bambu Studio (Don't know yet if they work on different Machines, please tell me if you tried).

Files are Sliced in 0.2 Layer Height with Fuzzy Skin. Eyes and Nose are modified, so there is no Fuzzy Skin, just a normal print. I added a Colored and non Colored File, so you can choose which you like to use.

Colored Version takes roughly 5hr, no Color around 2 1/2hr. (on BambuLab X1C)

.gcode for the Colored Version has the Color Transition set to the minimum of Waste. (Color change set into infill)

UPDATE:

20/03/2023: deleted/renamed the original .3mf File and uploaded another one, seems People had Problems changing their desired settings because of a wrong selected printer in Bambu Studio, which caused to several problems, like deleting the build plate, ...

20/03/2023: Added only the .3mf File as requested, so you can add specific Changes to the model

This remix is based on
