Summary

upright-floating plastic ducks.

[Art & Design](#) > [Sculptures](#)

Tags: [duck](#) [ducky](#) [floaty](#) [rubberduck](#) [ducks](#) [buoyant](#)

Upright-floating plastic ducks.

each duck file comes with a different set of accessories (some accessories may affect ability to float upright)

all files are designed to be printable without supports.

Recommended settings for default size:

Infill: 8% triangle.

Walls: 3 or more

More bottom layers can be added to increase stability.

Prints in ~40 minutes with recommended settings.

To prevent the growth of bacteria, it is recommended that 3D prints are to be sealed with a waterproof coating if they are to be used as bath toys.
