updated 2. 5. 2023 | published 2. 5. 2023

## Summary

Modified @nomad\_alto\_695008 dock so that it fits over the rubber in the JSAUX dock, and simplified the model. For HB0603

I recommend printing it with the back flat on the build plate and using support unless your printer is really good at bridging, there is a 75mm gap that would need to be bridged.
