Summary

Made to hold my Mitutoyo Calipers, should work with many others too.

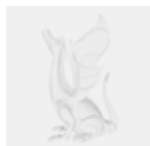

[Hobby & Makers](#) > [Organizers](#)

I found a similar thing by User @steair which is great and prints well, I just prefer to have the full Skadis Hooks in the back, so I built a Version myself from scratch.

I would suggest 20% Infill, as it feels a bit flimsy with less.

No supports needed.
