updated 23. 4. 2023 | published 23. 4. 2023

Summary

A snap-on lid for keeping cat food from drying out in the fridge.

[Household](#) > [Pets](#)

Will most likely fit any other 75mm or 5.1oz cans as well.

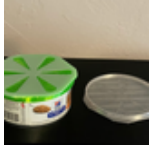

Two versions included - one with an inset pattern and one that is plain. Depending on your filament and print settings, the inset pattern may allow some air to pass through.

Best printed in PETG or a similarly durable, flexible plastic because it's less likely to scrape off into the food than PLA, which can crumble and produce small fragments.

Parametric f3d included.

Public domain license.
