Summary

Broke the latch on my husky toolbox so I made another with the help of a file from Thingiverse.

I broke/lost the latch to my beloved husky toolbox. I made this as an exercise in fusion so it's not perfect.

If you need the other part that connects the latch to the lid, there's a great file by robiscash on thingiverse. <https://www.thingiverse.com/thing:5921423/files>

These should fit together pretty well. My part is a bit loose but everything fits together nicely and isn't bothersome enough to where I want to fix it. Supports should be optional but if you're finding interference/fit issues then I'd suggest you try the organic ones!
