updated 6. 4. 2023 | published 6. 4. 2023

### Summary

Rook Foot with integrated XT60 connector. Heat insert hole for compensating different rod length.

[3D Printers](#) > [3D Printers - Upgrades](#)

Tags: [foot](#) [rook](#) [xt60mount](#)

Mirror in slicer to you liking. Used supports.

Also the additional screw hole is for a M3 heat insert, because I put a throughhole in the bottom frame for the rods, to be able to compensate the difference in height of the edges.

License according the originating designs. Attribute these designers if remixing.

Send me a message if this is done wrong. I really don't care about licensing.
