Summary

pipe feeder

[Household](#) > [Pets](#)

Feeder for use with 69mm (outside diameter - standard drain pipe size) PVP pipe. 2 models uploaded, the one in the photo has a slight baffle at the bottom to restrict grain / pellet flow, whilst the other has a vertical feed tray so no baffle required. Both work with layers pellets, anything smaller (budgie / finch etc.) seeds, the latter model would be better.

Terrible photo, the digital measurement shows the internal diameter to pipe holding area, so you've got 0.5mm wiggle room to accommodate the 69mm pipe. Small pilot holes provided for 3mm screws, feel free to open these out with a drill for larger bolts, or modify the stl. file.

Settings: 3-4 walls, 30%+ infill. supports required.
