Summary

A simple solution for mounting speakers in my conservatory.

Tags: [stand](#) [wallmount](#)

I needed to mount one central and 4 corner speakers in my conservatory (with the amp. and bass unit standing on the floor and driven via. a wi-fi link from my jukebox). Thinking that I may wish to change the speakers at a later date and not wanting to drill holes in the conservatory I decided to make hanging brackets which seem to do the job perfectly. I tried all black and all white and finally settled on black base and white hangers as shown in the pics.
