Summary

opens in a really cool way revealing the dog ID

[Household](#) > [Pets](#)

Tags: [dog](#) [tag](#)

this is a dog tag that opens in a really cool way with the help of some gears.

you will need to print 2 of each door piece and 2 pins, everything else is just one piece.

only other thing needed is glue to secure the nameplate, pins, and doors.

let me know in the comments if you have any questions or issues with the model working.
