DOOD! Easy multi-colour Prusa Magnetic Build Plate Dog Tag.

Easy to customize Dog tag. :)

*Printed in Galaxy Black Prusament really makes it look like a textured PEI sheet.

Hope you like!

Instructions:

Open .3mf file in PrusaSlicer. Edit text to your liking.

OR, (if you want to do it yourself):

Open the .stl file in PrusaSlicer.

Slice the file and select layer height 3.2mm

Click the plus sign to insert a color change.

Right click the text area of the tag and choose Add Part, Text.

Change Depth to 0.4 and customize to your liking.

*Note - Scale it down if your smaller dog doesn't want to rock the big bling tag...

*Note 2 - It seems our **cat is not fond of it** for some reason. Perhaps she is jealous? Consider your cat's feelings and print them a scaled down one. ...That's up next...

...I'll probably get around to making a smaller pre-made one at some point.
