Update:

The camera occasionally made contact with the display. Unfortunately, I was unaware of this issue as I had switched to a different display. To address this, I modified the setup so that the camera now sits 2 mm higher.

CAUTION

The mount is very tight.

I used @TomJohnson_629466's model as a template.

I printed it with Prusa PETG Galaxy Black

This remix is based on

Aukey Webcam Mount For Ender 3 S1 Pro (Aukey LM1E)
