This is my very first shared model!

**Version 1.0** so still very much trial and error, I'm open to feedback for improvements.

**Models are pre-orientated ready to print, you may need to arrange on bed for multiple parts at once.**

**I created everything to be printed at 0.2mm layer high NO SUPPORTS, 0.4 Nozel on Ankermake M5. Here are the settings I found worked best for me on the M5.**

#### The Egg Hoops:

I printed at 50-100% infill (How heavy you want them), 4+ Walls(Durability)

50-100mms, slower is better.

**Base:**

10-20% infill with 3-5 Walls, 150mms

**Ears:**

5-10% infill with 5+ walls (they gotta take a hit), 150mms

**Peg and Inserts:**

Printed at 100% infill and 3 Walls. 250mms

(You may need to trim the very tip of insert depending on fit)

**Basic Game idea:**

Using 3 Egg Hoops, toss each, one at a time, over the Bunny Ear posts.

1 point per Bunny Ear caught in an Egg Hoop.

If you get on Egg Hoop over both ears, 5 Bonus points!
