This is a replacement handle for a Kenmore microwave. The part number is 3650W1A075H

but it's been discontinued.

I've included the .stl file for the handle and also a base to which the handle can be attached for sanding painting. The base will keep the handle from warping during finishing.

This part was sanded smooth and finished with automotive paint.

Print Settings

Printer Brand:

Creality

Printer:

CR-10S

Rafts:

No

Supports:

No

Resolution:

0.16

Infill:

50%

Filament: Inland PLA+ silver

Notes:

No supports required. There may be a bit of terracing on the curved portions of the handle but this can easily be removed by sanding.

The first attempt at finishing failed when the client hung the handle near the outlet of his shop furnace to dry. The handle warped, making it unusable. The second attempt succeeded beautifully when the paint was allowed to cure without exposure to heat.
