Summary

Pontos Headphone Stand for all Pontic Greeks around the world

[Gadgets](#) > [Other Gadgets](#)

I made this for myself and thought it would be a good idea to share it for anyone who wants to give it a try.

I print it at 0.24mm with 0.4mm nozzle and came out very smooth and nice.

Print without supports

It is three different prints, one print is the stand that needs to do it with color change at the last layers, the second print is the base and the third print is the Pontic Lyra that you make it with color change too.

I am uploading only the 3mf file of PrusaSlicer because the model has negative added parts and can't be exported as single stl file.

Model files
