Summary

A bracket for mounting the Anker 10 Port 60W Data Hub

[Gadgets](#) > [Computers](#)

Tags: [mount](#) [usbhub](#) [cablemanagement](#) [wiremanagement](#)

A quick design to hold an [Anker 10 Port USB Data Hub](#) in place and provide a channel above the hub big enough to route cables through. Mounted with 2, [2.5 X 10mm wood screws](#).

The tabs will hold the hub in place but not going to hold up to a hard push, so I'd suggest mounting it in a place where you have access to push on the back when putting cables into the hub.

The hardware is the same hardware I bought for the [Hinged Cable Clip V2](#) and I highly recommend this design if you're looking for more cable management.
