This is basically an old school Change Purse that can be printed in any color, and is designed to fit the hand and pocket nicely. It is TPU 3D printed and because it fits the hand so nicely. It is also a great stress reliever squeeze toy carried right in your pocket. It is capable of holding up to 6 dollars in quarters and still squeezable to relieve stress. I have also added a 3mf to print on a Bambu labs X1CC-X1 and P1P. Use a 7mm brim and enable regular support. Unplug the AMS put your TPU on the single spool holder of your machine. Choose generic TPU from the drop down menu and this will print nicely. You can print up to 2 at a time in print by object mode.

Printer Brand:

Creality

Printer:

Ender 3

Rafts:

Yes

Supports:

Yes

Resolution:

0.02 standard

Infill:

30%

Filament: [3D MaLiang TPU](#) Black

Notes:

This has to be printed at a slow speed 15-20mm per second and I used Tab Plus in Cura Slicer a 35mm tab 10 layers high with a cross pattern infill of 30% along with a 15 line brim touching the tab. The part has a built in tare away section to make it printable in the strongest position. An x-acto knife maybe necessary to detach this from the print. If you have Cura Slicer the best thing to do is to download G-code file to your printer or use the 3MF Cura project file. Also it helps to print to be more durable if can print at like a quarter or 25% fan speed.

If you want the lettering to stand out a little trick that I use to color objects and art is UV activated finger nail polish. It is inexpensive holds up well and in some cases adds more strength to your parts. Kits and UV lights maybe purchased from Amazon or one of the slow boats from china sights. (Alibaba - AliExpress, Bangood or wish)

Have fun with this project and don't be afraid to innovate and incorporate. Its also nice to tip the designer if you like and use their art an innovation.

Sincerely;
