Inspired by <https://www.thingiverse.com/thing:3044013> but found that it did not fit without needing to sand down the main body of the model.

So I redesigned the whole thing. It should be a tight fit but I have included the f360 and step file if you need to modify it.

This remix is based on

Squash Ball Feet for Ender 3 (or 2040 Bars)

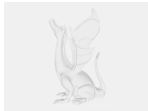

by [picsnapr](#)
