Get in the mood for spring with this 3D-printed bike helmet. Its compact size makes it a perfect display item on your desk, shelf, or bookcase. It is a great gift for bike enthusiasts or anyone who appreciates unique and creative accessories.

The supports are harder to unwrap than a xmas gift - but once you get them off it's a nice solid piece. The original walnut size model takes about 1.5 hours to print.

STL attached for resizing etc..

WARNING: Obviously, DO NOT use this model as a riding bike helmet that goes on your actual head.
