Summary

A few patterns that weren't in the original set to complete my edge pieces.

The original design of modular baseplates is perfect for me.... but there's a couple edge pieces I need to finish off the job that aren't in the original options.

Mine aren't 100% perfect. I literally just squared off the edges to make a flat surface, so you can see that it's purely flat and doesn't have the chamfered edge on the bottom where my modifications are... but they meet my needs and maybe will be helpful for someone else too.
