### Summary

A holder for Bosch 18V Blue batteries.

[Hobby & Makers](#) > [Tools](#)

Tags: [cordlessdrill](#) [boschprofessional](#)

Created in Tinkercad. Printed OK in PLA, both flat (faster, but you can see the need for support in the rebate) and upright (stronger and recommended) with 0.24mm layer height and 15% gyroid infill (using SuperSlicer).

Choice of one, two or three battery size to store charged and waiting-to-be-charged batteries. Let me know if there is a particular configuration you would like to see added.
