### Summary

A Simple game where you match picture tiles that I played as kid

[Toys & Games](#) > [Other Toys & Games](#)

Tags: [matches](#) [tactile](#) [memorygame](#) [matching](#) [memorychip](#)

A collection of 21 designs and 1 blank on round tiles, inspired by a game I played as just a wee tot.

Flip all tiles over so image is down, take turns flipping 2 tiles over and try to make matches, remembering previous flips you and your opponent made. When you make a match, remove the tiles from the board and they go into your pile. Person with the most tiles at the end wins.

The shapes are easy to recognize and this is a great game for building memory skills for ANY age, young and old alike. There is one tile that's blank and can be played as is, used to create your own original tile by drawing or pasting pictures or can be used as a wild card.

You do not need to use all 44 tiles for game play but you do need to use them in pairs. It can be played alone or with as many people as you like.

Print flat side down and do a color swap when you have about 3 layers left (depending on your settings) any colors will work but high contrast is best.

I also have a set of square tiles, so see that listing as well.

Print 2 of each!!!!
