Summary

Name tag for a wedding. Easy reference for each person where to sit. Nice card holder, based on a design on printables.

Nice name tag, that we use for our wedding.

The card holders can be put on the table.

We vary the colours, based on the food preferences of each and every guest.

Further, I uploaded a sliced version with color change for the Prusa Mini+.

If you print with 0.15 / 0.2 mm layer height, there is a nice fit of the rings to the base. There is no need for glue :)

If anyone wants to remix the design, I added the Autodesk Fusion360 Extract as well :)

For questions please feel free to reach out to me.

Best regards Torben

Concerning the remix.

Adjusted the versions on printables.

Made 3 pieces out of it. This helps to have a nice resolution of the result, even though you print at 0.15 layer height. Print time is reduced by half, whilst print quality increased.

This remix is based on

Wedding card holder/stand
