Summary

A flexible train track segment which my kid happens to use alongside his Duplo train.

Tags: [duplo](#) [flexible](#) [lego](#) [track](#) [train](#)

This is not a replacement or addition for LEGO Duplo Train-Tracks. It just so happens that my kid confuses the different toys and uses them side by side. But kids are kids :D

The track element is split into 6 interconnected segments which allows for a complete different type of track with lesser constraints than a duplo train track. As it is not an elastic design, there is no tension to the rest of the track. But the train may move the segments when it is driving over the track.

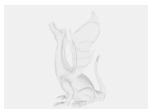

Source-File (FreeCAD) included.

Usage:

You may want to add Supports for the hooks.
