updated 2. 9. 2023 | published 2. 9. 2023

### Summary

A new, improved version is available here. This new holder is fix and it is made for the default Pi Zero W case.

[A new, improved version is available here.](#) This new holder is fix and it is made for the default Pi Zero W case.

[Prusa Mk2 mounter by Aero3D](#) is great, but I had a couple of problems:  
1) the mounter does not allow the connect the rpi zero with the printer via usb;  
2) the rpi hit the fan when the axis are set to home.  
With this remix (I used the original file, and reworked with openscad) it should be fine, I will upload photos as soon as I take them.

### Print instructions Category: 3D Printer Accessories Summary

[A new, improved version is available here.](#) This new holder is fix and it is made for the default Pi Zero W case.

[Prusa Mk2 mounter by Aero3D](#) is great, but I had a couple of problems:  
1) the mounter does not allow the connect the rpi zero with the printer via

usb;

2) the rpi hit the fan when the axis are set to home.

With this remix (I used the original file, and reworked with openscad) it should be fine, I will upload photos as soon as I take them.
