Summary

the old plastic cracked when i tried to push them into the ground so created some new ones

The diameter is Ø32 for the bottom part going in to the lantern if this does not fit you i can adjust the diameter for you
i printed at 20% infill and worked fine for me

i also printed with no supports, its possible you will need some supports if you want a clean print, mine made some spaghetti at the first overhang but i just cut it away, its just going underground so it dosent really matter.

printed with PLA
