Summary

This dosing cup locks in to the grinder chute, allowing you to grind without a portafilter connected.

Tags: [58mm](#) [dosingcup](#) [breville](#)

A simpler option for those interested, this dosing cup lets you use the built-in grinder of the Breville (Sage) Oracle without having the portafilter locked in. This allows you to prepare your puck without using the auto-tamp feature, so you can WDT to reduce channeling issues.
