I decided to make a funnel compatible with Brita Maxtra, Aquaphor B25(B100-25 Maxfor) and other water filters.

The funnel should fit 5-12L Water bottles from Bulgaria, with the adapter it should fit Big Water Jugs from the same region (16-19L).

Please write a comment if it's compatible with the bottles and jugs in your country.

The filter should have a tight fit without the rubber part, but two versions included just in case.

WARNINGS:

- Use food safe filament

- The water filter won't make unsafe to drink water - safe. Always use safe to drink water!
- I designed this model to print on my printer, I don't guarantee it will fit perfectly for you. You may have to make adjustments

It prints well without supports.
