I took the tabletop from <https://www.myminifactory.com/object/3d-print-billaragage-13887> and reworked it a bit. Most of the other parts are new work.

"Banana for scale"

Print Settings

Printer Brand:

Anycubic

Printer:

Vyper

Rafts:

No

Supports:

Yes

Notes:

The base box will print a lot faster if you use a huge wall thickness such as 3.2 mm . The walls print faster than the "interior".

Post-Printing

I used 5/16-inch slingshot clay pellets for the balls, because they are reasonably dense as well as easy to paint. (the 9mm triangle fits these)
The pockets will work with slightly larger balls; you can find all sorts of material-type balls (metal, polypropylene, wood) here and there on line. If you choose a different size, just adjust the triangle to match.

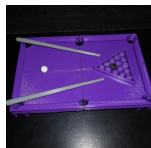

That said, don't expect cushion rebounds to be anything like a real table. Just enjoy.

How I Designed This

Meshmixer all the way.

Category: Games

This remix is based on

3D Printable Billiards
