## Summary

Functional minimalistic bookend

[minimalism](#)

I wanted something functional but easy to store away. It uses about 20g of filament.

Just bend the middle part up, click it into place and use it as a book end for small and medium-sized books. It's sturdier than it looks.

I recommend 0.2 layer height and 30% infill.

Two versions: PETG and PLA.

## Model files

**minimalistic\_book\_end\_petg.stl**

**minimalistic\_book\_end\_pla.stl**

☐ The middle part is a bit thicker, but it's a lot sturdier like that.
