I really loved this model but there are a 90 degree overhangs which cause extrusion into mid air in both the body and the head. Although these overhangs are internal to the model they make a bit of a mess that needs cleaning up post print.

I fixed the overhangs so that they are much more printable.

I also split out the eyes to make them easier to print as well, and added a flat edge to them so they can lay flat on the bed for printing.

One last thing, is that I modified the eyes to enable me to mount a neo pixel light ring. I will add the full remix to that once it is done, however that means that the pupils in this remix are not compatible with the original. The large and small eye parts should be ok but will still need gluing as in the original.

The originals can be found here. <https://www.thingiverse.com/thing:3571062>

enjoy

## Print Settings

### Rafts:

No

### Supports:

No

### Resolution:

200

### Infill:

20

**Filament:** PolyMaker PLA

Category: Containers
