### Ferrari Duplo Car

If your Duplo figures have to go from a --> b, they may as well do it in style.

### Model Pieces

Car is made up of 2 or 3 pieces.

Ferrari body is required

Tires and Wheels can be printed separately if you want to create the tires from TPU, or there is a combined Tires and Rim piece as well.

### Print Settings

No Supports Required

I printed the tires with Fiberlogy Flex and used rafts, print time approx 20 mins/tyre.,

Body is printed with PLA, 80mms print time approx 10 hours.

Rims are printed with Fiberlogy Impact PLA for additional strength. Print time approx 40 mins per rim.

## **Construction**

Rims click into place and are easily enough removed.

Tires slide on and are a good fit if printed with TPU.

## **Shameless Plug**

## **Feedback and Makes**

I really like getting feedback and despite having thousands of downloads I have only 1 comment and 0 makes!

It really makes a difference and feels great when you leave a comment, like, or collect things to the people who post them, so Please do that for all people as it builds community. Super important in these Covid Times. Even if you do not post things you are still part of the community (in fact you are the majority of the community), so please like, collect and comment!

Please do this for all stuff you download from everybody!

## **Print Settings**

### **Printer Brand:**

Creality
